

Relevant information when you need it

Adeptic Search Web & Intranet is a complete solution for finding relevant information on your web and intranet portals. Adeptic Search Web & Intranet works like a help desk that figures out what the user is interested in and guides them accordingly. Allowing your visitors to find answers on their own can help increase your profitability and efficiency by decreasing the amount of incoming calls and emails.

No matter how deep down the information resides, formatted in contact- or document databases, in html-, PDF- or MS-documents, Adeptic Search will find it and deliver results in a matter of milliseconds. Due to our innovative pricing models, you can measure your return on investment (ROI) within months of installation.

Choose if you want to install Adeptic Search Web & Intranet on your own servers (Appliance solutions) or if you want us to host your solutions (Remote solutions) . Regardless of which solution you go for, Adeptic Search works well with all known content management systems, EPlserver, SiteVision, Polopoly, Drupal, Wordpress and Joomla.

Get started with Adeptic Search Web and Intranet in a matter of days. Our flexibility and effectiveness creates endless possibilities to help achieve optimal affects well into the future.
