

# Adeptic Search Suite

Adeptic Search Suite offers a full line of search engine solutions for [ecommerce](#) <sup>[1]</sup>, [web and intranet](#) <sup>[2]</sup>. We help our clients design, build and manage search solutions throughout the Nordics. For more than two decades we have gathered experience and since Adeptic was founded in 2004 we have created many successful search installations based on our proprietary [AESS](#) <sup>[3]</sup> technology.

Thanks to our beneficial subscription pricing model, the total investment of ownership is often regained in months rather than years. Adeptic understands the individuality of our clients and offers flexibility in managing your solutions. Through customized plans, our clients and their hosting partners can host our products (Appliance solution) or Adeptic can host them for you (Remote solution).

Our unique method, Adeptic Rapid Proof of Concept, can be evaluated free of charge with your own data. With Rapid Proof of Concept you can even use the installation in production for a limited time to really see the difference ([read about Rapid Proof of Concept here](#) <sup>[4]</sup>).
